

JETSITE

The ultimate digital advertising strategy for **Small business**

JETSITE a lightning fast Website

The **JETSITE** is a fast, Google validated and optimised website for Australian business.

JETSITE
\$399 Initial Year* Price includes GST

A **JETSITE** with its high speed accelerated mobile page (AMP) helps a business to quickly enter the online space and stay there at an extremely affordable price while delivering the customer a stress-free user experience. As a small business in today's market we believe that you need a fast mobile preferred website to help your business come up in places like Google and Facebook. You also need it to add legitimacy to your business online and offline. But we don't believe you need to spend thousands of dollars on that website.

Why a JETSITE

We think that the future for small businesses online is providing the customer the best user experience you can when showing up on platforms like **Facebook** and **Google**. Customers will make their decisions based on reviews from those bigger platforms and the speed of your site to respond to and support those positive comments about your business. Checking the website needs to be quick and easy for your customers, especially if it is only to verify the business and its services exists. If we look even further ahead we think Artificial Intelligence and Virtual Personal Assistants with voice activation will be doing the searching for the customer. Thus we believe businesses need an incredibly fast but optimised website to appeal to those machines, help them rank on the big platforms and create a seamless experience if the customer does actually come to their site. But we think that businesses should be focusing most of their effort on providing the highest quality service and generating positive reviews for their business to pull in as many customers as possible.

This is why we are offering the most modern and cost effective website package available today.

JETSITE Features

The **JET** website has a dedicated domain name, professional business email, all your company's key information and is fully AMP compliant. It's modern design is optimised as a superior stand alone accelerated site or as an automatic fast mobile entrance page linked for older sites.
